Statement "Ukraine"

Dear Business Partner,

the unnecessary war in Ukraine is a human catastrophe. We are deeply shocked by the developments and our warmest sympathy goes out to the millions of people affected. In particular, the fate of many children and young people causes great sadness. For this reason, GFD mbH decided at the beginning of the conflict to support refugee children from the children's home "Vaterheim" near Kiev in their new start in Freiburg with 5000€. The project is of course looking forward to further support.

Besides the shocking human consequences, there is of course also the concern about a stable supply chain. We can confirm that we have no production facilities or suppliers in Ukraine or Russia. Therefore, no outages are currently to be expected. The likely impact on the world market and the basic supply is difficult to assess and remains to be seen. Should there be any problems or delays, we will inform you promptly in order to find solutions.

We remain with the kindest regards and hope for an early end of the conflict.

CEO Erika Löblich
